Online-Education Project Manager for Industrie 4.0 / Digitization / IoT topics in Start-up in Munich

Who we are

University4Industry is revolutionizing the Learning Experience! Learning with us is **fun, personalized, interactive**, and most importantly, **efficient for learners**. With U4I, industry employees are learning **relevant skills** for their personal development. We are currently working on **Industrie 4.0 & Digitization** topics with a focus on practical use and application. We work together **with companies and industry experts** to develop content for companies and industry – **but this is only the beginning**!

Become part of our team and build the Online Learning Platform for the Digital Revolution with us!

Your Tasks

Are you interested in **digitization** and **digital learning**? Is helping online learners be successful an interesting challenge for you? Do you want to explain complex topics in a simple, motivating, and effective way? Do you like to constantly learn about new topics? Are you good at managing projects and working with customers?

This job might just be what you're looking for:

- You will independently lead projects with our customers (from concept creation to active usage management)
- You will manage the success of our customers
- You will take a **leading position** in content development projects with industry partners
- You will **contribute to all phases of the content production process**: content creation & structuring, pedagogical concept, creation of learning material, and publishing learning content
- You will help us **continue to develop** our **product** and **processes**

Your background

- You have relevant **experience** in **(online) education, industry** or a relevant **technical field** (2-5 years work experience a plus, but not required)
- You have project management and leadership experience
- You hold a degree (Master, PhD or similar) in **engineering, science, technology journalism** or **education, pedagogy, psychology**
- You are interested in **topics like Industrie 4.0, IoT & digitization** and their technical subdomains like machine learning or connectivity
- Complex tasks with tight deadlines don't upset you, instead you **enjoy the challenge**
- You are fluent in **German** and **English** (native speaker of either a plus)

What we offer

You want to learn something new and make a difference? You're passionate about it and would like to have practical experience with visible results? Then here's why we are good fit for you:

- We are **still a young start-up**: from day one you will make a **real impact** with **visible results**
- We are **growing fast & aggressively**: you will be part of something big!
- We are an **experienced, versatile & dynamic team**: you will learn a lot from your colleagues!
- We are a **young & creative start-up**: you will have fun and enjoy coming to work every day!
- You'll earn an **attractive salary**, including long-term success participation
